Have you ever felt tied up in knots, wondering how to interpret something someone else said or not knowing how to say something you need to say? Is negativity and rudeness impacting productivity, loyalty or morale in your workplace?

By applying these tried-and-tested communication best practices, you can build your reputation, boost your credibility, influence others in significant and positive ways, and even improve the bottom line.

After attending this interactive and practical workshop, you will be better able to:

- Understand what civility is and why it is essential to effective communication in your workplace.
- Identify and avoid communication habits that may be undermining your (or your organization's) credibility.
- Adopt one or all of ten proven communication best practices that relate to verbal, nonverbal, written and electronic communications.
- Be recognized as a professional who communicates with clear purpose and saves others time and energy.
- Exhibit high social competence and a service-orientation that will leave a long-lasting impression with whomever you communicate.
